Conversation analysis (CA) is the dominant contemporary method for the analysis of social interaction. Originating at the University of California during the 1960s (Sacks, 1992), the field has a broad interdisciplinary reach, and is used to study interaction in many languages on an effectively worldwide basis.

### **Conversation Analysis - OBSSR e-Source**

This article examines the effects of negotiated interaction on the production and development of question forms in English as a second language (ESL).

### **Conversational Interaction and Second Language Development**

ABSTRACT Second language acquisition (SLA) research suggests that some of the processes that occur during conversational interaction may facilitate second language learning. Carrying out communicative tasks designed to promote these processes can provide learners with the opportunity to focus on linguistic form in the context of meaning.

interaction" (1999, p. 19). The goal of conversation analysis is to discover and describe the organization of social interaction and to understand better how this organization reinforces the structures of social organization and institutions. Thus, they consider conversation as "talk in interaction" (1999, p. 19).
