The total effect only intensified and grew more exciting with each new event. With scaffolding that precise and a visual connection that strong, even my weakest students were drawing eerily accurate graphs.. They grew fanatical about accuracy, asking me to replay the footage five times for one particular event.

A data set (or dataset) is a collection of data. Most commonly a data set corresponds to the contents of a single database table, or a single statistical data matrix, where every column of the table represents a particular variable, and each row corresponds to a given member of the data set in question. The data set lists values for each of the variables, such as height and weight of an object ...
