The Montessori Method of education, developed by Maria Montessori, is a child-centered educational approach based on scientific observations of children. Montessori's method has been used for over 100 years in many parts of the world. The Montessori method views the child as one who is naturally eager for knowledge and capable of initiating learning in a supportive, thoughtfully prepared ...

85% of the brain is formed by age three The core structure of the brain is formed in the first three years. By age three, the brain has established a pattern of processing information that will be used throughout life. 1 As such, your child's early experiences affect the quality of his brain architecture, forming the foundation upon which future development rests.

Quality preschool programs that develop the whole child through age-appropriate socioemotional and cognitive skill-building hold promise for significantly improving child outcomes. However, preschool programs tend to either be teacher-led and didactic, or else to lack academic content. One preschool model that involves both child-directed, freely chosen activity and academic content is Montessori.
