The Molecular, Cellular, and Developmental Biology department conducts research and trains undergraduate and graduate students in the science and technology of modern micro-biology at the University of Colorado Boulder. This discipline includes laboratory benchwork, computational analysis, and field work (both clinical and environmental) to investigate questions in biology.

Cell biology (also called cytology, from the Greek *κύτος*, *kytos*, "vessel") is a branch of biology that studies the structure and function of the cell, which is the basic unit of life. Cell biology is concerned with the physiological properties, metabolic processes, signaling pathways, life cycle, chemical composition and interactions of the cell with their environment.

### **Cause of Cambrian Explosion - Terrestrial or Cosmic?**

Chemical biology is a scientific discipline spanning the fields of chemistry and biology. The discipline involves the application of chemical techniques, analysis, and often small molecules produced through synthetic chemistry, to the study and manipulation of biological systems. In contrast to biochemistry, which involves the

study of the chemistry of biomolecules and regulation of biochemical ...

1. INTRODUCTION - OVERVIEW - Biology as a science deals with the origin, history, process, and physical characteristics, of plants and animals: it includes botany, and zoology. A study of biology includes the study of the chemical basis of living organisms, DNA. Other related sciences include microbiology and organic chemistry.

x Small animal irradiators enable the interrogation of translationally relevant irradiation protocols and beam geometries. This study reports on the characterisation of early and late pulmonary toxicities occurring both in- and out-of-field, and the corresponding clinically-relevant dosimetric parameters.
