Powder diffraction is a scientific technique using X-ray, neutron, or electron diffraction on powder or microcrystalline samples for structural characterization of materials. An instrument dedicated to performing such powder measurements is called a powder diffractometer.. Powder diffraction stands in contrast to single crystal diffraction techniques, which work best with a single, well ...

## PIPELINE FUNCTIONAL SPECIFICATION FOR PIPING SPECIAL ITEMS

Thanks for choosing material properties development process. We can develop new type of materials or we can extend life, properties and services of the material, There is vast scope in your subject.

Box and Cox (1964) developed the transformation. Estimation of any Box-Cox parameters is by maximum likelihood. Box and Cox (1964) offered an example in which the data had the form of survival times but the underlying biological structure was of hazard rates, and the transformation identified this.
