This Handbook outlines in detail Cochrane's methods for conducting systematic reviews of interventions, including planning, literature searching, assessing bias

Cochrane Handbook for Systematic Reviews of Interventions

The job demands•resources (JD•R) model was used to examine the relationship between job characteristics, burnout, and (other•ratings of) performance (N = 146). We hypothesized that job demands (e.g., work pressure and emotional demands) would be the most important antecedents of the exhaustion component of burnout, which, in turn, would predict in•role performance (hypothesis 1).

Using the job demands•resources model to predict burnout

Introduction. Research on dialogue is concerned with the study of how communication takes place through language in conversation. This involves, among other things, investigating what makes a dialogue coherent; how dialogue participants coordinate to take turns in speaking and to achieve mutual understanding; and how knowledge about how dialogue works can be used to design artificial agents ...

Box and Cox (1964) developed the transformation. Estimation of any Box-Cox parameters is by maximum likelihood. Box and Cox (1964) offered an example in which the data had the form of survival times but the underlying biological structure was of hazard rates, and the transformation identified this.

Clinical psychology is an integration of science, theory and clinical knowledge for the purpose of understanding, preventing, and relieving psychologically-based distress or dysfunction and to promote subjective well-being and personal development. Central to its practice are psychological assessment, clinical formulation, and psychotherapy, although clinical psychologists also engage in ...

Clinical psychology - Wikipedia

Beer is one of the oldest and most widely consumed alcoholic drinks in the world, and the third most popular drink overall after water and tea. Beer is brewed from cereal grains—most commonly from malted barley, though wheat, maize (corn), and rice are also used. During the brewing process, fermentation of the starch sugars in the wort produces ethanol and carbonation in the resulting beer.
